DETAILED ACTION

Oath/Declaration

The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because: The declaration does not indicate a priority claim under 35 U.S.C. § 119 (a) - (d) for Japan patent application no. 2002-197597. See pages 2 and 3 of the declaration.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 9 to 16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 9 (as well as dependent claims 10 to 16) provides for the use of "a pyrophosphoric acid bath for use in cyanogen-free copper-tin alloy plating, characterized by containing an additive (A) composed of an amine derivative, an epihalohydrin and a glycidyl ether compound," but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

Claim 9 (as well as dependent claims 10 to 16) is rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example *Ex parte Dunki*, 153 USPQ 678 (Bd.App. 1967) and *Clinical Products, Ltd. v. Brenner*, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 to 16 are rejected under 35 U.S.C. 102(b) as being anticipated by European Patent Application No. 1 146 148 A2 (EP '148).

EP '148 discloses a pyrophosphoric acid bath for use in copper-tin alloy plating on various substrates without containing any cyanide ions. The pyrophosphoric acid bath disclosed by EP '148 contains the same chemical components as claimed by the applicants (an amine derivative, an epihalohydrin, and suitable additives such as brighteners and surfactants that provide an improved coating gloss) with concentration ranges that appear to overlap applicants' claimed concentration range limits. The pyrophosphoric acid baths disclosed by EP '148 have pH values that range from 7 to 10. See line 45 on page 2 to line 27 on page 5.
